Technology in Action

SAGEM F@ST™ 800
SAGEM F@ST™ 840
USB ADSL modems

ADSL for everyone Specifically designed for residential and SOHO markets, SAGEM F@st™ modems allow High-Speed Internet access through a single ADSL line. Thanks to this technology, the user benefits from the best of the Internet: unlimited and high-speed connection with the telephone line remaining available. Thanks to the performances of the SAGEM F@st™ ADSL modems, surfing on the Internet, playing interactive games, or listening to a radio on line becomes easy and quick.
The SAGEM F@st™ 800/840 modems are very compact. Their USB interface allows the easiest installation possible. Just plug the modem into your PC and the Broadband Internet is just a click of the mouse away…

A truly universal solution : no need to worry about the ADSL line

SAGEM F@st™ modems are compatible with about every DSLAM available worldwide.
- The SAGEM F@st™ 800 modem can operate on any existing ADSL over POTS line.
- The SAGEM F@st™ 840 modem is compatible with ADSL over ISDN lines.

All types of connection are supported (PPPoA, PPPoE, fixed IP).

Supported Operating Systems

The SAGEM F@st™ 800/840 modems can run on all the usual platforms: Microsoft Windows 98, 98SE, 2000, ME, XP, MacOS 8.6, 9, X, Linux.

Installation and support

The SAGEM F@st™ is the ultimate Plug & Play modem. There is no need to configure anything with it. Service Providers can also easily customize the modem installation software.
Once the modem is installed, the user benefits from an extremely clear and complete diagnosis tool available on the PC toolbar.
Any question regarding the configuration? Relying on this tool, the Service Provider Hotline will be able to assess the modem status quickly.
